

Managed Services

Our managed services are incorporated with the necessary tools and methodology to deliver comprehensive end-to-end services. At the same time, we will select the most cost-effective model to further enhance our customers' operations. Our services are:

- Project Management
- Project Implementation
- Infrastructure System Operation and Maintenance
- Facilities Management Outsourcing

We manage server infrastructure with multiple Operating Systems, high performance storage solutions, network connectivity with full security implementation, application and databases. Our expertise and full Facilities Management services provide our customers with a truly, complete end-to-end solution.

We pride ourselves with having a strong service delivery team equipped with capable leadership, managerial and extensive techno-functional skills.

About CrimsonLogic

CrimsonLogic is a trusted partner to governments. For over 20 years, CrimsonLogic has worked with governments around the world to find innovative and sustainable solutions to collaborate more seamlessly with their citizens. The company has continued to set industry-standards by delivering the world's first eGovernment solutions. CrimsonLogic provides end-to-end services, from designing to operating these services to drive substantial and lasting improvements.

Consulting Services

Infrastructure Solutions & Consulting Services

CrimsonLogic aspires to transform our customers' businesses with proven IT infrastructure solutions that streamline processes and increase productivity. We are a one-stop IT solution provider that offers consultancy, solutions, implementation and maintenance support.

What We Offer

Our solutions are targeted at enterprises, governments and organisations looking for deployment of technology solutions that will enhance their existing operations.

Design & Consultancy

Our in-depth expertise involves:

- Infrastructure Architecture Design and Consultancy Services
- ASP and Cloud IaaS Models with DR achieving up to 99.999% SLA

Over the years, we have implemented many mission critical systems at a nation-wide level for Singapore and many other countries. These include turnkey solution and pay per use cloud solutions.

Cloud Solutions

To deliver cloud computing for enterprise private cloud or service provider public cloud, the infrastructure needs to be agile enough to quickly react to business changes. As infrastructure technologies increase in complexity, platform independent infrastructure can only react quickly when as much human dependency is removed from the deployment chain, leveraging on orchestration and automation technologies.

Our knowledge and accumulated track record in the last decade have put us in a good position to provide reliable, secure, mission critical and automated systems to help organisations in their cloud adoption. We design, build and implement solutions for:

- Public Cloud
- Private Cloud
- Government Cloud

Our key strength is building private cloud environment for both the commercial and government sectors in the IaaS and SaaS space.

Infrastructure Solutions

We are able to provide end-to-end solutions to customers through consultative discussions on infrastructure requirements, security needs and application deployment. We provide product solutions in:

Systems

- Systems (x86 and Unix)
- Storage

Network Infrastructure

- Wireless Technology
- VOIP / IP PABX Technology
- Cabling

Security

- Network Security
- Systems and Endpoint Security
- Virtualisation Security
- Application Security
- SIEM Monitoring & Log Correlation

We work closely with world leading technology partners to ensure a smooth delivery of our solutions.

Data Centre Solutions

We customise end-to-end data centre solutions, coupled with a wide variety of Facilities Management services. Our range of hosting options brings peace of mind to our customers' mission critical operations. Our range of solutions are:

- Call Centre Services
- Technical Helpdesk Services
- Co-location Hosting
- Web Hosting (share infrastructure)
- Infrastructure Monitoring Services

Within our service framework, processes and documentation are enforced and will continually be used to enhance operation and application management. Our data centre and support personnel will monitor the required service levels to ensure maximum and smooth operation, while adhering to industry standards at the same time.
