Electronic CertOfOrigin

© What is it?

The Electronic CertOfOrigin (eCO) System is a web-based application and certification system that provides a single online interface to apply and print Certificate of Origin (CO).

The eCO System allows exporters to submit an application electronically. It also enables the approving authorities to approve and certify Certificate of Origin applications online with easy retrieval of supporting documents. Approved Certificate of Origin can be transmitted immediately to recipients such as the Customs officers, banks and overseas buyers.

© Key Features

Electronic submission of Certificate of Origin (CO) application

Online approval of CO

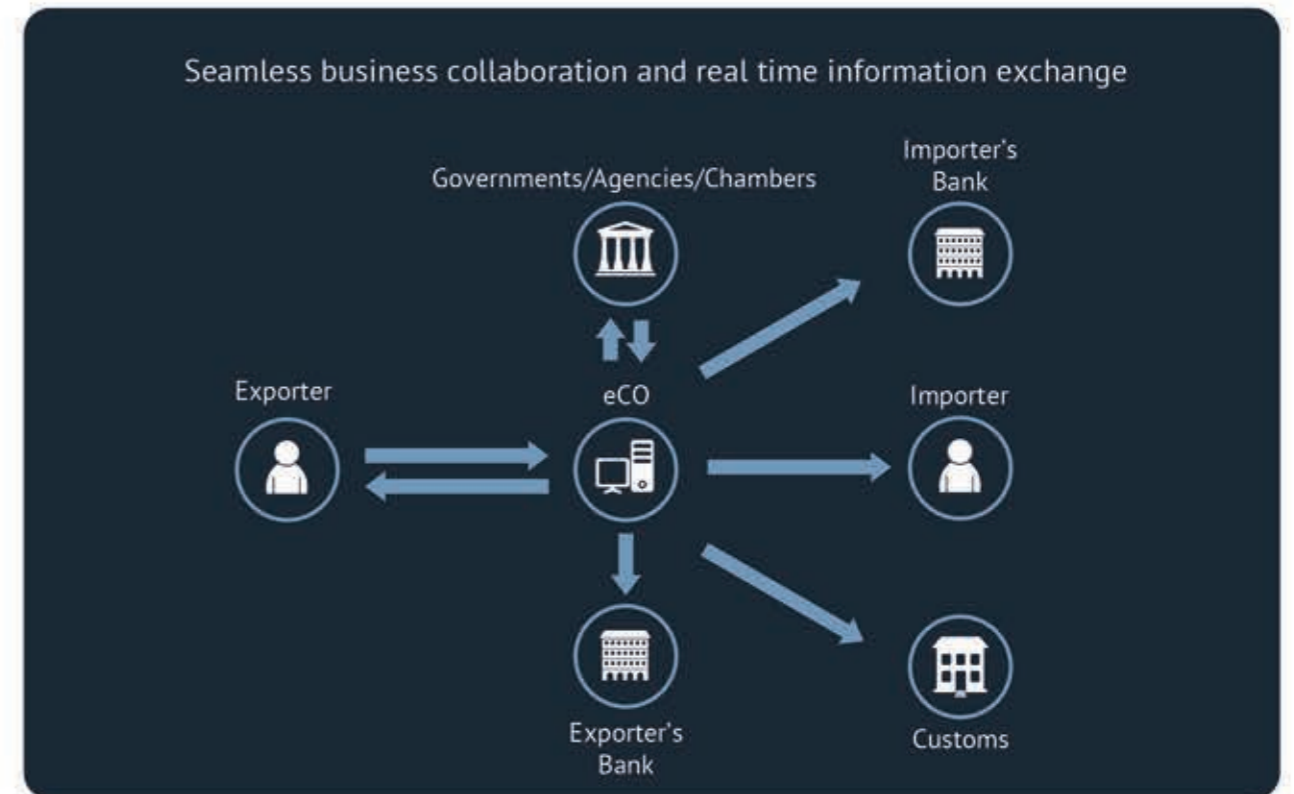

Online tracking of application status

Convenient retrieval and controlled self-printing of CO

Seamless data integration with external systems

Multiple layers of optical document security features built into the system

- **Anti-Counterfeit:**
Authenticity of a document
- **Anti-Forgery:**
Integrity of a document

© Benefits of Electronic Certificate of Origin

Cost and time saving for exporters

Exporters can now apply for a CO online, anytime. The electronic application process liberates the exporters from the manual tasks of submitting numerous documents and physically dispatching hardcopy documents to multiple parties such as the chamber, embassy, banks and overseas trading partners.

Time saving and process simplification for government and chambers

Automation of data validation and customisation of approval workflow have shortened the application process. This saves significant amount of time as the manual processes are automated electronically. It also provides fast and accurate compilation of statistics and improves transparency.

Trade Facilitation

The eCO System enhances the efficiency of the entire trading process and facilitate the movement of goods through system integration.
