

PRESS RELEASE

Ontario Government Names CrimsonLogic a Vendor of Record

CrimsonLogic Signs Two Master Agreements with the Ontario Government for the Provision of IT Services to the Ontario Public Sector

RICHMOND HILL, 13th January 2015 – CrimsonLogic, a leading global provider of eGovernment solutions and services, has been selected as a Vendor of Record (VOR) by the Government of Ontario for the provision of information technology services.

The Ontario Public Service and organizations in the Broader Public Sector (municipalities, healthcare facilities, and educational institutions) will now be able to leverage on CrimsonLogic's unique eGovernment experience as well as its innovative and sustainable IT solutions.

“As an official Vendor of Record, CrimsonLogic will have wider access to business opportunities,” said Ken Wye Saw, Chief Executive Officer, CrimsonLogic. “We believe that this arrangement will help us bring our world-class eGovernment solutions to Ontario's public sector. We seek to enhance the lives of local citizens and improve efficiencies of business communities in Ontario and all around the world.”

CrimsonLogic was named on two VOR: Task-based I&IT Services VOR, and I&IT Solutions Consulting Services VOR. The Task-based I&IT Services VOR is utilized by government clients to obtain short-term human resources to support IT project work; and the I&IT Solutions Consulting Services VOR enables government clients to procure end-to-end solutions directly from CrimsonLogic. These agreements enable CrimsonLogic to bid on opportunities within a pre-qualified group of vendors.

Ken concludes: "Our global track record with experience in large-scale eGovernment projects has enabled CrimsonLogic to build upon our best practices. This pre-qualification will hopefully present an effective platform to share our knowledge and elevate Ontario's public services to the next level of efficiency."

About CrimsonLogic

CrimsonLogic is a trusted partner to governments. For more than 25 years, CrimsonLogic has worked with governments around the world to find innovative and sustainable solutions to collaborate more seamlessly with their citizens. The company has continued to set industry standards by delivering world-first eGovernment solutions.
